SEWER OR DUMP CHARGE

Many RV'ers take for granted that dumping sewage (holding tank) at a campground is routine and simple, and although the physical part of the dump may be simple, what happens to the residue left here isn't. Sewage here goes into a lift station, is ground and treated with bacteria and pumped into a **SURFACE LAGOON**, where the bacteria, atmospheric oxygen, and sun act to digest and neutralize the sewage with the help of aeration and surface injected hydrogen peroxide. RV'ers using a formaldehyde based tank deodorant reverse our sewage processing, because formaldehyde **KILLS** bacteria. Incoming RV's hold the key to our lagoon being light green and odor free or gray and rank. Thanks for your cooperation.

SITE CHARGES

Grand Forks Campground reserves the right to charge for services available, regardless of whether the camper anticipates use of said services, thus, our base rate for a site reflects what is available for use and not necessarily what minimum service is requested by the camper.

PLEASE HELP US PREPARE FOR THE CAMPER COMING TOMORROW - DRIVE AND PARK ON THE GRAVEL.
